Powering the Future: Harnessing Life Sciences for Sustainable Innovation

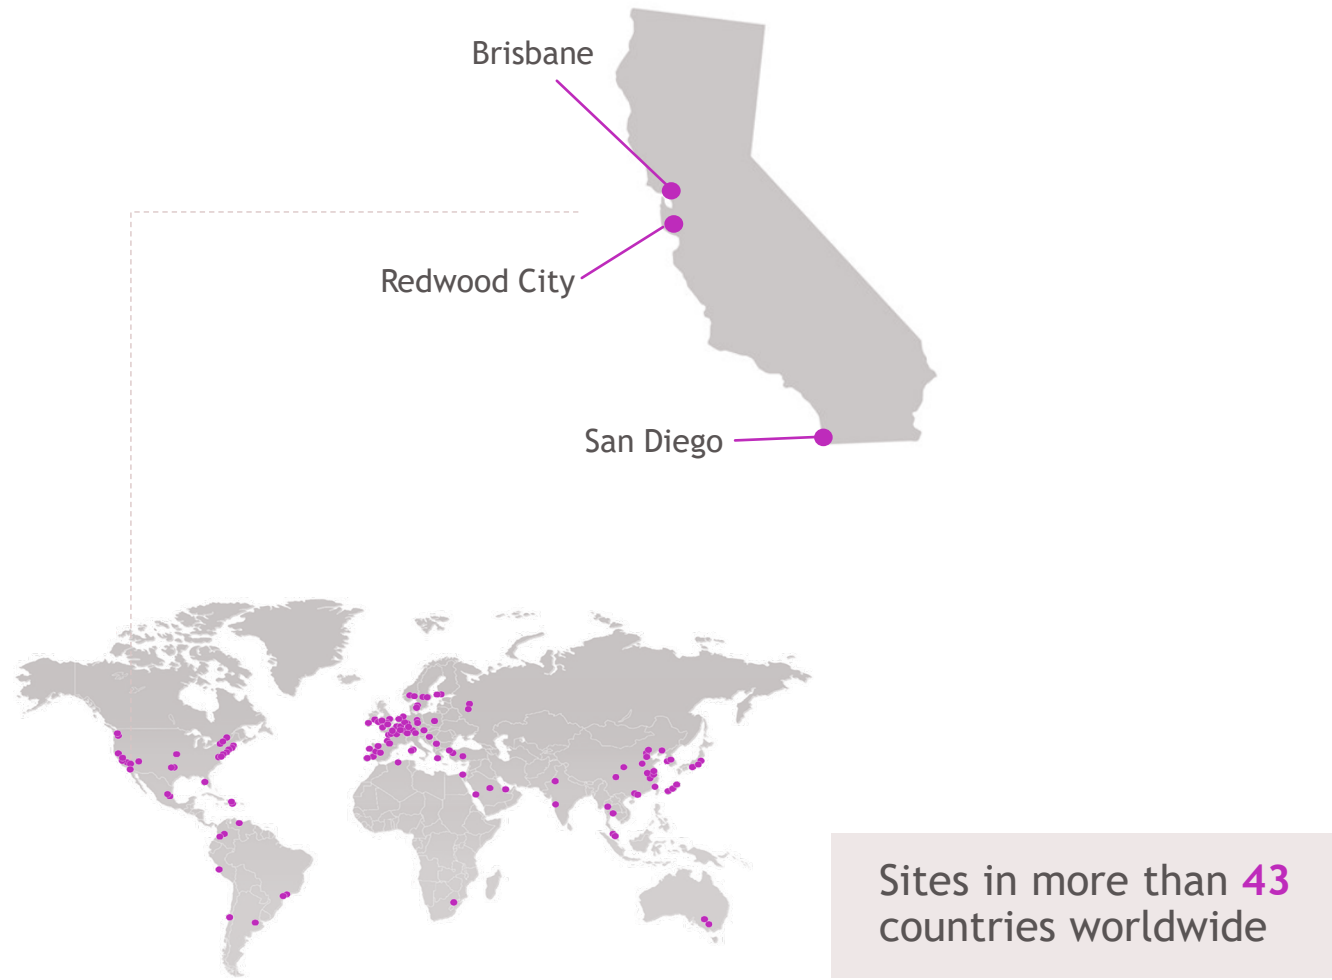

August 13, 2024

Amy Patton
Executive Director, Global Facilities Operations

 Bristol Myers Squibb®

In California, we have **775+** employees working in San Diego and the SF Bay Area

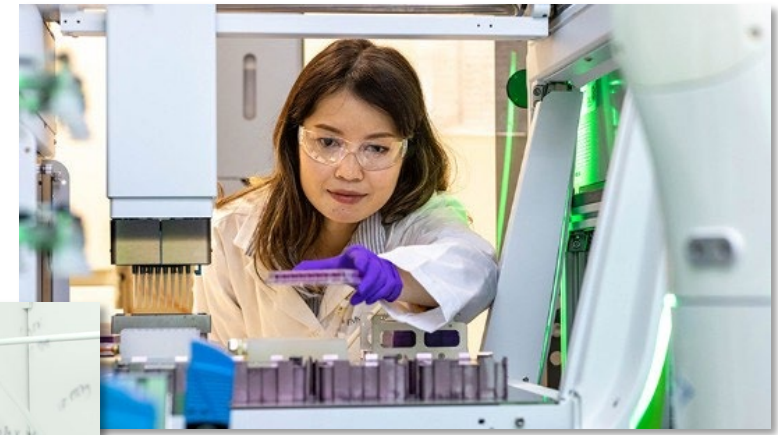

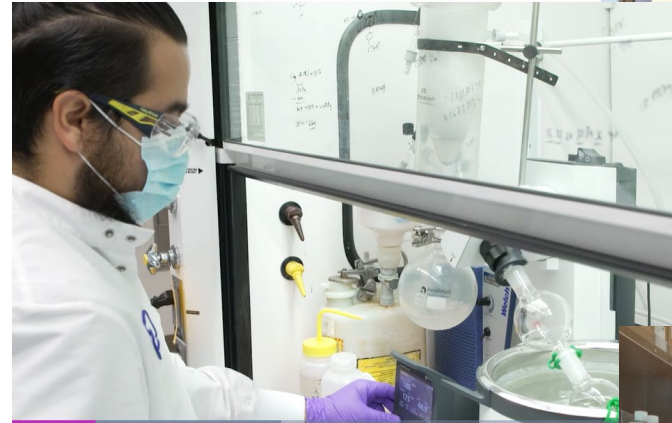

San Diego

~500+ employees working across 4 R&D facilities in La Jolla focus on the exploration of novel biology and target concepts - such as targeted protein degradation - and complex biologics, aiming to better understand and modulate the biological processes that lead to cancer and degenerative neurological diseases.

SF Bay Area

2 R&D facilities in Brisbane and Redwood City house **~275+ colleagues** spanning early research to early and late clinical development. Teams in the Bay Area collaborate across many therapeutic research areas, including hematology, oncology, immunology and cardiovascular disease.

BMS in California

BMS receives SBTi validation of near-term and net-zero targets

Achieving our 2024 Environmental Goal of receiving validation of our science-based emissions reduction targets and advancing our environmental sustainability journey

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Our Environmental Goals

We manage our environmental footprint with a science-first approach, which has guided the development of our goals
